

NQP BEAM 15

WARNING LIGHT BAR

PART NO. 21106

The **NQP BEAM 15** is a low-profile LED light bar designed for service vehicles, roadside assistance, construction equipment, and other professional vehicles. Featuring high-output LEDs, 19 selectable flash patterns, and a robust construction, it provides effective warning signalling in demanding working environments.

The slim design supports both magnetic and fixed mounting options, while the wireless controller allows for convenient operation. Built for professional use, the light bar delivers reliable performance and long service life in daily operation.
